Qussai Abu Shehadeh

+962 788593621 | mr.qussai2004@gmail.com | Portfolio | LinkedIn | GitHub | Codeforces

Summary

Data Science and AI graduate focused on ML/AI engineering, with hands-on experience taking models from data collection and training to production. Built and launched Ilna, a live AI-powered study platform using LLMs, semantic search and speech-to-text, and trained real-time computer vision models for exercise form evaluation. Codeforces Expert and ICPC Jordan Top 30 finisher with strong algorithms and problem-solving skills.

Education

Al Al-Bayt University — Mafraq, Jordan
B.Sc. in Data Science and Artificial Intelligence — *Sep 2022 – Jun 2026*

Experience

AI & XR Development Intern — Jul 2026 – Sep 2026
Beyond Universe — *Amman, Jordan*

- Contributed to a custom AI Agent SDK used as a shared foundation across all company projects
- Worked across two parallel workstreams, supporting both the AI and XR development teams
- Integrated and configured third-party Unity packages to extend XR project functionality

Game Development Trainee — Mar 2026 – May 2026
Mays Alward — *Amman, Jordan*

- Developed gameplay features for a 3D first-person game built from scratch with Unity, Blender and C#
- Collaborated with a multidisciplinary team to design, test and refine game mechanics

Projects

Ilna | *Python, FastAPI, LangChain, ChromaDB, SQLite, SQLAlchemy, React, TypeScript* — Website

- Built and launched a live platform solo that helps university students organize courses and lectures
- Built AI pipelines that turn slides and lecture recordings into transcripts, summaries and practice quizzes
- Integrated Whisper (speech-to-text), Qwen3 (semantic search) and Gemini (summaries, quizzes)
- Built a student community and an admin dashboard for moderation and premium plans

PoseFitAI | *Python, TensorFlow, PyTorch, OpenCV, MediaPipe, YOLO* — Repo

- Built a desktop AI personal trainer that evaluates exercise form in real time from a webcam feed
- Designed an end-to-end computer vision pipeline combining detection, pose estimation and movement classification
- Owned the full ML lifecycle: collected and labeled workout videos, trained, evaluated and deployed pose-based deep learning models
- Supports squats, shoulder press and push-ups, automatically counting correct reps and flagging common mistakes

Technical Skills

Languages: Python, C++, C#, SQL
Machine Learning & AI: PyTorch, TensorFlow, Scikit-Learn, LangChain, Prompt Engineering
Computer Vision: OpenCV, MediaPipe
Backend & Data: FastAPI, REST API, SQLAlchemy, SQLite, Vector Database, ChromaDB
Tools: Git, GitHub, Unity, Blender, Cloudflare

Awards & Achievements

Codeforces Expert: 800+ problems solved in C++ (1,000+ across all platforms)

ICPC Jordan Collegiate Programming Contest: Top 30 (2025), Top 50 (2024)

First Place: AABU Programming Contest (2023 & 2024)
